</table>

**Discount Type:**
- Product Discount
- Apply to all my products

**Coupon Amount:**
- 0

**Allow Free Shipping:**
- 

**Coupon Expiry Date:**
- 2016-07-07

**Minimum Spend:**
- No Minimum

**Maximum Spend:**
- No Maximum

**Individual use only**
- 

**Products:**
- Search for a product...
- Exclude Products
  - Search for a product...

**Email Restrictions:**
- No restrictions
  - List of allowed emails to check against the customer's billing email when an order is placed. Separate email addresses with commas.
Under the “Usage Restrictions” tab, specify the minimum/maximum amount on which the coupon can be applied. You can select “Exclude sale items” if you don’t want the coupon to be applied during a sale.

Next, select the product(s) on which the coupon can be used by customers. Select the products you want to exclude.

Under the “Usage limits” tab, add the usage limit per coupon. Finally click on the “Add Coupon” button. Coupon is created.
View Store

This is the store. All the products will be displayed here. When the customer adds this to the cart
There is an option to apply coupon. When the customer specifies the coupon code and clicks on the “Apply Coupon” button, the coupon amount will be deducted from the total.
The Shipping calculator will update the total based on the shipping costs (if any).
